

Power Equipment Warehouse is here to help!
Briggs and Stratton Model Numbers

We must have the correct Model, Type and Code Number to be able to supply the correct part.

**To find the where the information that is required is located on your engine, see below.
Many parts may look the same but they may be different.**

Explanation of Briggs & Stratton Model Number System

Example: 303447 1234-01 01061201 (Model Type Code)

The chart below explains the numerical model designation system. It is possible to determine most of the important mechanical features of the engine by merely knowing the model number.

	First Digit After Displacement	Second Digit After Displacement	Third Digit After Displacement	Fourth Digit After Displacement
A	B	C	D	E
Cubic Inch Displacement	Basic Design Series	Crankshaft Orientation	PTO Bearing, Reduction Gear, Auxiliary Drive, Lubrication	Type of Starter
6	0	0 to 4 - Horizontal Shaft	0 - Plain Bearing/DU Non-Flange Mount	0 - Without Starter
8	1			
9	2	5 to 9 - Vertical Shaft	1 - Plain Bearing Flange Mounting	1 - Rope Starter
10	3			
11	4	A to G - Horizontal Shaft	2 - Sleeve Bearing Flange Mounting Splash Lube	2 - Rewind Starter
12	5			
13	6	H to Z - Vertical Shaft	3 - Ball Bearing Flange Mounting Splash Lube	3 - Electric Starter Only 110V Gear Drive
16	7			
17	8			
18	9		4 - Ball Bearing Flange Mounting Pressure Lubrication on Horizontal Shaft	4 - Electric Starter/110V Gear Drive with Alternator
19	A to Z			
20				
22			5 - Plain Bearing Gear Reduction (6 to 1) CW Rotation Flange Mounting	5 - Electric Starter Only 12V Gear Drive
23				
24			6 - Plain Bearing Gear Reduction (6 to 1) CCW Rotation	6 - Alternator Only
25				
26			7 - Plain Bearing Pressure Lubrication on Vertical Shaft	7 - Electric Starter 12V Gear Drive with Alternator
28				
29				
30				8 - Vertical Pull Starter or Side Pull Starter
31				
32			8 - Plain Bearing Auxiliary Drive (PTO) Perpendicular to Crankshaft	9 - Mechanical Starter
35				
38				
40			9 - Plain Bearing Auxiliary Drive Parallel to Crankshaft	A - Electric Starter/12V Gear Drive with Alternator & Inverter
42				
43				
44				
46				
52				
58				

EXAMPLE: To Identify Model **303447**

30	3	4	4	7
30 Cubic Inch	Design Series 3	Horizontal Crankshaft	Ball Bearing Flange Mounting Pressure Lubrication	Electric Starter 12V Gear Drive With Alternator

TYPE:1234-01 The type number identifies the engine mechanical parts, color of paint, decals, governed speed and Original Equipment Manufacturer.

The code number identifies the assembly date of the engine. In some instances it is necessary to know the code number as well as the model and type number when performing adjustments, repairs or ordering replacement parts for an engine. Here's how it works.

CODE: 01061201 The code is the manufacturing date and is read as follows:

- 01 - YEAR
- 06 - MONTH
- 12 - DAY
- 01 - ASSEMBLY LINE AND MANUFACTURING PLANT
